Dear Customers

MOL Marine & Engineering Co., Ltd.
Takashi Nakashima, President & CEO

Notice of NI DP Training Course fee change, MOL DP Training Center

Thank you very much for your continued patronage of MOL DP Training Center. We wish to extend our gratitude for your continued support.

In light of the recent developments, we have been facing a substantial rise in operating costs due to the rapid depreciation of the yen and increased interest rates since the launch of our courses last June. These factors have also led to an overall increase in prices.

Our commitment to providing you with exceptional training remains unwavering. In fact, we are dedicated to enhancing the content of our training programs and developing new ones based on your valuable feedback. To ensure we can continue delivering high-quality services, we find it necessary to make a modest adjustment to the tuition fees for our current DP training courses in the NI domain, with an approximate 10% increase across the board.

We genuinely apologize for any inconvenience this may cause, and we are deeply grateful for your understanding and continued partnership during these challenging times. Your support is instrumental in our efforts to maintain and improve our training offerings.
